

MicroWedge™ Model 1921

Bar Code Reader

Overview

The MicroWedge™ is a compact, reliable, bar code reader that interfaces with any XT, PC, PS-2, or Macintosh computer without changes to the host software. The MicroWedge installs in seconds: it simply plugs in-line with any standard keyboard. Output, from the bar code scanned, appears as if it were typed directly into any software such as, databases, spreadsheets, word processors, or custom applications.

The MicroWedge™ with stainless steel pen and interface cable attached.

Applications
